March 18, 2020

Dear Valued Patient,

For the safety of our patients, visitors, staff and providers, Grand Valley Oncology is taking protective measures against the spread of COVID-19 (Coronavirus). These measures follow guidelines from the Centers for Disease Control (CDC) and Colorado Department of Public Health & Environment.

Please review the following precautionary visitation restrictions:

- Patient visits are limited to one adult visitor at a time.
- No visitors under the age of 18 are permitted in the building.
- No visitors who are exhibiting COVID-19 symptoms are permitted in the clinic.

Additionally, patients and visitors will be screened for COVID-19 symptoms before entering Grand Valley Oncology. This will include asking about travel history, symptoms, possible exposure to COVID-19 and taking temperatures.

Routine follow-up appointments will be limited until further notice. To stay in contact with your oncology team you may utilize telemedicine (appointment via telephone). Please contact our office to schedule this appointment.

If you are exhibiting COVID-19 symptoms (a fever of 100.4°F, cough and/or shortness of breath), please contact Grand Valley Oncology by calling 970-644-3180 prior to coming to your appointment. Our triage team will discuss your symptoms and determine if a visit or further testing is necessary.

Please visit [CDC.gov/Coronavirus/2019-ncov](https://www.cdc.gov/Coronavirus/2019-ncov) for more information regarding COVID-19.

Thank you for your understanding during these unique circumstances.

Sincerely,

Grand Valley Oncology Medical Team
